Tomahawk™ System – A Novel Solution

Patented and Patent-Pending
Tomahawk™ System

Standard Vacuum Truck

In-ground watermain
up to 450' long

The Tomahawk™ System restores deteriorated pipes using abrasives and a high-volume, low-pressure airstream to clean and dry the pipe in preparation for lining without using water.

Prince Edward St., Vancouver, BC. Tuberculation Removal

- Water quality and capacity improvement
- Completed April 2015
- 608 meters, 6 pipe sections, cleaned in 4 working days to a NACE# 3 equivalent finish
- 150 mm (6") and 200 mm (8")
- 1949-51 cast iron pipe, structurally sound
- Service bypass installed
- Polyurea spray liner (SIPP) applied by Trenchless Solutions and Canadian Induracoat
